## Call for papers

### Introduction

Formal Concept Analysis emerged in the 1980's from attempts to restructure lattice theory in order to promote better communication between lattice theorists and potential users of lattice theory. Since its early years, Formal Concept Analysis has developed into a research field in its own right with a thriving theoretical community and a rapidly expanding range of applications in information and knowledge processing including visualization, data analysis (mining) and knowledge management.

### Submission details

**We invite scientific publications on theory and applications of Formal Concept Analysis. Papers of up to sixteen pages may be submitted in PDF or Postscript format. For each paper, an abstract must be submitted by December 10, 2012. For more details see [the submissions page](#)**

### Organization

The conference will be hosted by the Dresden University, Germany.

### Conference Chair

Bernhard Ganter, Technische Universität Dresden, Germany

## **Program Chairs**

Peggy Cellier, IRISA lab, Rennes, France

Felix Distel, Technische Universität Dresden, Germany

## **Important Dates**

**Submission of Abstracts:**

**December 10, 2012** Submission of Full Papers: **December 17, 2012** **No**

**tification of Acceptance:**

**February 15, 2013**

**Camera Ready Copies Due:**

**March 8, 2013**

**Conference:**

**May 21-24, 2013**
